

RUTUJA MORE

SOFTWARE DEVELOPER

Katraj, Pune | 7219582763 | rutujamore1601@gmail.com

PROFILE

Software Developer with hands-on experience across the full stack (Node.js, PHP, CodeIgniter, Laravel, MySQL, MongoDB, HTML/CSS/JavaScript, Bootstrap). Skilled at designing RESTful APIs, building scalable backend architecture, and deploying applications to cloud platforms (GCP, DigitalOcean, GoDaddy). Strong problem-solver and collaborative team player with a focus on secure, high-quality software and internet security best practices.

SKILLS

Node.js, PHP, CodeIgniter 4, Laravel, MySQL, MongoDB, HTML, CSS, JavaScript, AngularJS, Ionic, Bootstrap, GitHub, GitLab, Postman, RESTful API Design, Internet Security, Data Labeling

WORK EXPERIENCE

Software Developer — IOWeb3 Technologies Pvt Ltd

2022 – Present

Curiotory (Live Project)

Online language-learning platform delivering educational content and resources across multiple languages, including MCQ tests and video lessons.

Tech stack: CodeIgniter, PHP, MySQL, Ionic, AngularJS

- Designed and built RESTful APIs for core platform features.
- Designed and maintained well-functioning relational databases.
- Developed backend architecture to collect and process learning data.
- Deployed and maintained the application on cloud servers.

Resurs-AI

AI-driven interview platform that parses a candidate's resume and automatically generates interview questions based on the skills and projects it identifies.

Tech stack: Node.js, MongoDB, Ionic, AngularJS, Python

- Built RESTful APIs to support login and interview workflows.
- Designed and maintained well-functioning databases.
- Developed backend architecture to collect and process resume/interview data.
- Deployed the application on cloud servers.

Careers & Me (Live Project)

Online learning and examination platform managing MCQ tests and course documents; generates a personalized Individual Development Plan (IDP) as a PDF based on test results.

Tech stack: Laravel, PHP, MySQL, HTML, CSS, Bootstrap

- Built RESTful APIs for test delivery and results processing.
- Designed and maintained well-functioning databases.
- Developed backend architecture to collect and process test data.
- Deployed and maintained the live application.

Hardev (Live Project)

Online medical report generation platform managing medical content and resources for multiple user types.

Tech stack: CodeIgniter, PHP, MySQL, AngularJS

- Built RESTful APIs for report generation and data handling.
- Designed and maintained well-functioning databases.

- Developed backend architecture to collect and process data.

Dashboard Application

- Collaborated with operations teams and managers to ideate and develop software solutions.
- Designed both client-side and server-side architecture for robust, scalable applications.
- Built visually appealing, mobile-responsive front-end interfaces.
- Developed and maintained well-functioning databases and applications.
- Wrote effective RESTful APIs for seamless integration and data exchange.
- Tested software rigorously for responsiveness, efficiency, and performance.
- Authored technical documentation to support development and maintenance.

TECHNICAL EXPERTISE

PHP

- Configured and optimized build processes for PHP applications.
- Wrote clean, efficient, maintainable PHP code, including asynchronous operations with promises and callbacks.
- Integrated with MySQL databases to fetch and update data dynamically.
- Built server-side applications using PHP frameworks, primarily CodeIgniter.
- Implemented request handling, authentication, and authorization.
- Managed routing, error handling, and security configuration.

Node.js

- Built server-side applications using Node.js and Express.js.
- Implemented middleware for request handling, authentication, and authorization.
- Managed routing, error handling, and security configuration.
- Designed and implemented MongoDB databases for Node.js applications.
- Configured and optimized build processes (transpilation, bundling, minification, code-splitting) for production-ready applications.
- Wrote efficient, scalable server-side JavaScript.

Deployment

- Deployed projects on GoDaddy with smooth, efficient server setup and management.
- Deployed to DigitalOcean, including configuring droplets, managing backups, and optimizing performance.
- Deployed applications on Google Cloud Platform (GCP) for high availability, scalability, and security.
- Configured GCP Compute Engine, virtual machines, firewall rules, and cloud storage integration.
- Configured servers, DNS settings, and SSL certificates for secure, reliable web hosting.

EDUCATION

Bachelor of Computer Science (BCS)

Sadguru Ghadge Maharaj College | 2019 – 2022

LANGUAGES

English, Hindi, Marathi
